

## Cyber security presentation available for businesses

The Devon and Cornwall Police's Cyber Protect Team are offering a presentation session called 'Cyber Myth Busters', this is available to small and medium enterprises (SMEs) and charities across Devon and Cornwall.

Throughout the past year, we've encountered numerous misconceptions about cyber security. Our mission is to debunk the top 10 myths that are preventing businesses from prioritising their digital safety.

We're seeking partnerships with local networking groups and other event organisers. 'Cyber Myth Busters' is more than a talk; it's a presentation packed with insights, myth-busting, and a straightforward guide to enhance your digital defences.

Highlights of 'Cyber Myth Busters':

- Unveiling the top 10 cyber security myths.
- Revealing why cyber security takes a back seat in many businesses and how to shift this perspective.
- Providing a simple, effective pathway to strengthen your cyber security.

This invaluable session is entirely free, our goal is to arm your business with the knowledge and tools to defend against the evolving landscape of cyber threats, and transform the way you think about cyber security.

We're inviting organisers of networking events to get in touch and bring this essential knowledge to your audience and embrace knowledge as your primary shield in the cyber world.

If you are Interested in hosting a 'Cyber Myth Busters' session please contact us by clicking on the 'reply' option at the bottom of our Devon & Cornwall Alert messages.
