

Police launch state-of-the-art Motorcycle Safety Simulator to drive down deaths and serious injuries

Devon & Cornwall Police have announced the arrival of a motorcycle simulator, which will be used to engage with inexperienced riders, in an effort to reduce the risk of motorcycle-related deaths and serious injuries on the roads.

Motorcyclists are one of the most vulnerable road user groups. Despite making up just 1% of total traffic, motorcyclists account for almost 21% of road deaths in Devon and Cornwall.

In 2022, 16 motorcyclists were killed on Devon and Cornwall's roads and a further 187 were left seriously injured, prompting the creation of a dedicated task force, supported by the Vision Zero South West road safety partnership, to help drive these numbers down.
